

## Product Information

### Electro-mechanical testing actuator EZ005 to EZ030

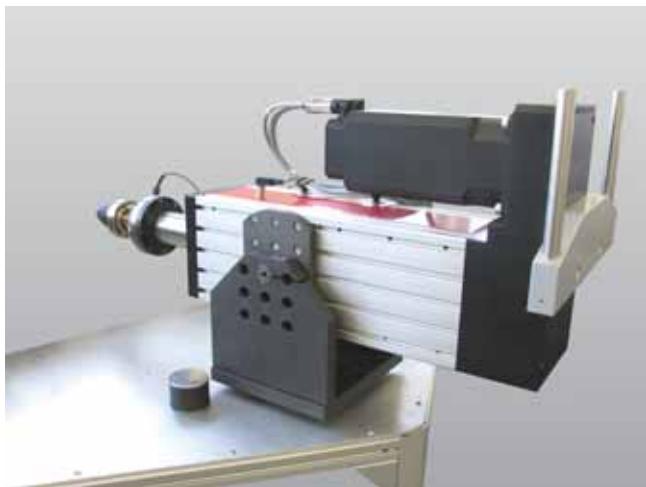

Figure: Electro-mechanical testing actuator large type

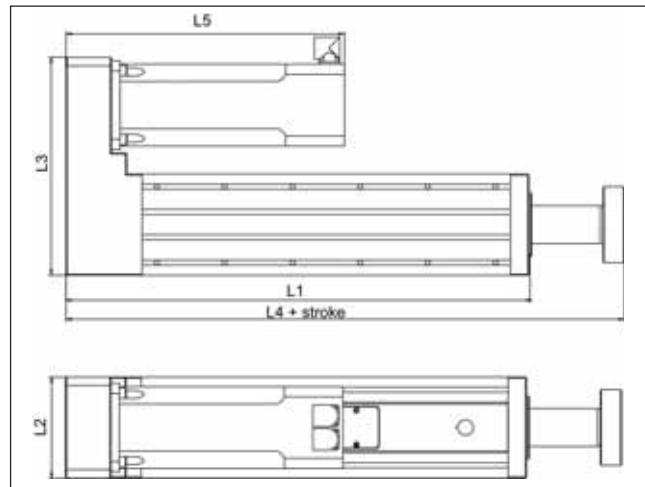

Figure: Drawing of electro-mechanical testing actuator

#### Application range

Multi-purpose testing axis for tensile and compression applications. For variable integration in test stands, production lines or customized constructions.

Dedicated for force/travel measurements with high demands on resolution, accuracy and speed.

#### Typical application areas

- Testing of materials, assemblies, components and complete end products
- Manufacturing processes with measurement performance (e.g. automatic assembly, mounting)
- Cyclic tests with large strokes

#### Advantages and features

##### Flexible usage

- Variable mounting via front or rear flange or via trunion mount
- Measurement and control electronics *testControl* in separate free positioning rack resulting in free positioning (rack optional in IP54 design)
- Flexible programming of test sequences due to versatile interfaces
- Ideally usage for clean room areas

##### High performance

- Speeds up to 30 m/min
- High resolution measurement and control electronics *testControl* for precise data acquisition with up to 500 Hz
- Closed loop control of force and travel with smooth switching between those modes

##### Integration in production lines

- Optional plug-in card provides freely definable digital inputs and outputs
- Easy integration of additional measurement devices (e.g. digital multi-meters)
- Optional operation via remote interface

##### Large variety of standard modules

- Easy mounting of Zwick load cells and tooling
- Operation via standard PC and *testXpert®* software
- Proven digital drive technology controlled by Zwick standard electronics

##### Easy to install and maintain

- Installation possible without additional infrastructure (like e.g. hydraulic pumps or pneumatic connections)
- Low maintenance costs and long lifetime
